8	I chose an 8 because there should be more constructive feedback or scaffolding for the students. While I know that as a teacher we need to provide feedback and scaffolding but there is only so much time in the day and while trying to run this activity it can be challenging. 7	I wish the program would use AI to help the students proofread their answers. I also wish that I could input a rubric that students would use to correct each other's answers.
